

'Taking away the hassle of hosting'

For further enquiries contact hosting@creative.uk.com

Creative can tailor a hosting package for you. We offer varying levels of support, from 'start-up' packages on our dedicated servers with basic email accounts, to your own customised dedicated server with databases, VPN, daily managed backups, reporting and statistical summaries.

We differ from many other hosting providers by being **service orientated**. We recognise that service is paramount and work in partnership with Rackspace whose Fanatical Support® promise has won industry-wide recognition.

These core values reflect the importance of customer service. We also monitor websites 24/7/365 to exceed our customers' expectations.

Servers

- Linux or Windows platform
